Chapter Title

Your name

Exercise 1

a)

You can write text wherever you want, just by writing text. For code, you can write chunks with three backticks as follows. Adding `js` after the backticks highlights the syntax as JavaScript.

```js
1  // example WebPPL code
2  var exampleFn = function() {
3      return flip ? "h" : "t"
4  }
5
6  viz(Infer(exampleFn))
```
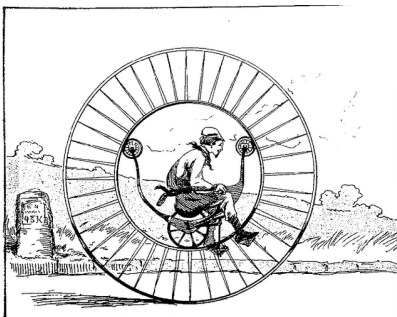

b)

You can also write math in LaTeX. Use single dollar signs for inline math ($x^2 = \sqrt{y_0}$) and double dollar signs for block math. For example

$$p(B|A) = \frac{p(A|B)p(A)}{p(B)}$$

Exercise 2

c)

You can include images in your report with . For example:

That should be all you need to do your ProbMods homework. Good luck!
